

GENERAL ADVICE

Paper 1:

- It is the by far the trickiest and hardest!
- Do a paper everyday and note down your every mistake and repeat the strengthen your weak points.

Paper 2:

- Do many papers as possible and expose yourself to different angles of problem and its approaches!
- **Note down and memorize answers from the marking scheme for commonly asked questions! These are your chances to collect marks!**
- Use flashcards with bullet points and revise them regularly.

Paper 3:

- Pay attention to your labs! Like it is so important for you to familirize yourself with the lab environment, equipment so you don't make accidental mistakes on your exam day.
- Always draw your microscope images in a closed shape (do not leave it open).

RESOURCES:

For my experience <https://alevel-notes.weebly.com/biology.html> has the best notes and advices by far. It also has flashcards(<https://quizlet.com/hananm81/folders/9700-a2-biology?x=1xqt&i=2amw3n>) which are very detailed perfect for memorizing important points.
(It also has amazing chemistry resources!)

For more detailed explanation on your topics watch Youtube videos or read from the Campbell biology book.
