

Geography IGCSE and AS level tips:

- Case studies are important! Learn the structure and memorize it depending on your study methods. I would recommend preparing flashcards or mindmaps.

Summary of basic case studies - link
Structure of the case studies - link
- Read different editions of books. (Especially when you do not understand a term or process)
- Watch videos and visualize case studies.
- Be careful with details. Also, read the question carefully and make sure you state your point clearly.
- Look at how many marks you should earn (write more sentences/points than the marks)
- Pay attention to the command words. (describe/explain/identify) - doing this can save you some time and get better marks
- Make your topic choice as early as possible, so that it will give you enough time to prepare for the case studies. (Only for AS students)
- Increase your writing speed
- For AS level, there will be not enough resources available to prepare your case studies, but you can always use your previous knowledge and find relevant resources on your own. You should also consider the number of resources available when choosing your topic.
- Read example candidate responses and model answers carefully.
- Work on your faults and improve.
- Be prepared to pop quizzes.
- Do not use too fancy or formal words that blurs the main points, however, you are advised to use key terms in your writing.
- Lastly, always be on time. Bataa teacher will never forgive you for being late.
